Candidate's Personal Platform Statement (not more than 200 words):

In order for Chapter Council to realise its full function it needs to represent a broad cross section of practitioners. While the knowledge gained through experience is invaluable, it is important to continually invigorate the profession by encouraging YOUNG practitioners to be INVOLVED and to find ways of making the RAIA relevant to this constituency.

As the inaugural Chair of DARCH and an ongoing DARCH participant, I represent young practitioners who may or may not be members of the RAIA. While the participants of DARCH events are NOT necessarily RAIA members and are also NOT necessarily registered architects, DARCH ACTIVELY promotes the value of membership to the RAIA. DARCH seeks to increase RAIA membership through its network and organised events. The greater the RAIA's membership base, the stronger we are as a profession to lobby local government and the media and increase the public's recognition of the unique service that architects provide. DARCH NEEDS representation on Chapter Council so that its role within the RAIA can be more relevant.
